Agenda #	Relate To	Position	Name	Comments	Attachment
61-D.		<b>Favor</b>	Abbey Springer	<p>I appreciate this agenda item being spoken on, as the County has not done enough to decrease the high rates of houselessness in Los Angeles, nor are there enough services that support people experiencing houselessness without conditions or terms.</p> <p>Long-term solutions that establish more affordable and permanent housing, while extremely important, do not help individuals in the present moment. Triage centers are an opportunity to provide short-term services and support to individuals who need it.</p> <p>Triage centers are an effective way to provide people experiencing houselessness with temporary shelter and services. Other areas that have established triage centers have seen impressive results, with some individuals engaging with service providers at the triage centers to the point that they could find stable shelter and employment.</p> <p>Triage centers are a simpler, stop-gap solution compared to long-term, stable housing. Triage centers can serve as temporary shelter from summer heat waves, a place to store belongings, somewhere to connect with service providers for more long-term support. This model can save lives by not leaving people experiencing houselessness without support or even temporary shelter.</p>	No

			Audrey DeLaney	<p>Long-term solutions that establish more affordable and permanent housing, while extremely important, do not help individuals in the present moment. Triage centers are an opportunity to provide short-term services and support to individuals who need it now. Other areas that have established triage centers have seen impressive results, with some individuals engaging with service providers at the triage centers to the point that they could find stable shelter and employment.</p> <p>I feel people often give up on houseless people because they cannot completely solve all of their problems at once; if we cannot find long-term, stable housing for them this instant, we should do everything in our power to provide for the most basic day to day needs. Triage centers can serve as temporary shelter from summer heat waves, a place to store belongings, somewhere to connect with service providers for more long-term support. Imagine having to store all of your belongings in an abandoned couch that was left out for garbage pick up, and losing it all when the city does their job of cleaning up the street while you are away. This is just one real life example from North Hollywood, I can only begin to imagine how many other stories there are like this. A triage center is the least we could do to help our houseless neighbors.</p>	No

61-D.		<b>Favor</b>	Clara M McCarthy	<p>I appreciate this agenda item being spoken on, as the County has not done enough to decrease the high rates of houselessness in Los Angeles, nor are there enough services that support people experiencing houselessness without conditions or terms.</p> <p>Long-term solutions that establish more affordable and permanent housing, while extremely important, do not help individuals in the present moment. Triage centers are an opportunity to provide short-term services and support to individuals who need it.</p> <p>Triage centers are an effective way to provide people experiencing houselessness with temporary shelter and services. Other areas that have established triage centers have seen impressive results, with some individuals engaging with service providers at the triage centers to the point that they could find stable shelter and employment.</p> <p>Triage centers are a simpler, stop-gap solution compared to long-term, stable housing. Triage centers can serve as temporary shelter from summer heat waves, a place to store belongings, somewhere to connect with service providers for more long-term support. This model can save lives by not leaving people experiencing houselessness without support or even temporary shelter.</p>	No

61-D.		Favor	Daniel Gaines	<p>I appreciate this agenda item being spoken on, as the County has not done enough to decrease the high rates of houselessness in Los Angeles, nor are there enough services that support people experiencing houselessness without conditions or terms. These services are important, because there are so many people living on the streets who experience an immense amount of physical and mental suffering every day. Although it may be easier to walk past them and pretend that they are fine, deep down we know many people are in desperate need of help. One example of this is that we desperately need many more cooling centers for these hot Summer months.</p> <p>Long-term solutions that establish more affordable and permanent housing, while extremely important, do not help individuals in the present moment. Triage centers are an opportunity to provide short-term services and support to individuals who need it.</p> <p>Triage centers are an effective way to provide people experiencing houselessness with temporary shelter and services. Favor	Emma Olson	<p>I appreciate this agenda item being spoken on, as the County has not done enough to decrease the high rates of houselessness in Los Angeles, nor are there enough services that support people experiencing houselessness without conditions or terms.</p> <p>Long-term solutions that establish more affordable and permanent housing, while extremely important, do not help individuals in the present moment. Triage centers are an opportunity to provide short-term services and support to individuals who need it.</p> <p>Triage centers are an effective way to provide people experiencing houselessness with temporary shelter and services. Other areas that have established triage centers have seen impressive results, with some individuals engaging with service providers at the triage centers to the point that they could find stable shelter and employment.</p> <p>Triage centers are a simpler, stop-gap solution compared to long-term, stable housing. Triage centers can serve as temporary shelter from summer heat waves, a place to store belongings, somewhere to connect with service providers for more long-term support. This model can save lives by not leaving people experiencing houselessness without support or even temporary shelter.</p>	No

Agenda #	Relate To	Position	Name	Comments	Attachment
61-D.		<b>Favor</b>	Katherine Yamamoto	<p>I appreciate this agenda item being spoken on, as the County has not done enough to decrease the high rates of houselessness in Los Angeles, nor are there enough services that support people experiencing houselessness without conditions or terms. These services are important, because it's important to meet homeless people on their terms. Otherwise we're never going to earn their trust and fix this problem.</p> <p>Long-term solutions that establish more affordable and permanent housing, while extremely important, do not help individuals in the present moment. Triage centers are an opportunity to provide short-term services and support to individuals who need it.</p> <p>Triage centers are an effective way to provide people experiencing houselessness with temporary shelter and services. Other areas that have established triage centers have seen impressive results, with some individuals engaging with service providers at the triage centers to the point that they could find stable shelter and employment.</p> <p>Triage centers are a simpler, stop-gap solution compared to long-term, stable housing. Triage centers can serve as temporary shelter from summer heat waves, a place to store belongings, somewhere to connect with service providers for more long-term support. This model can save lives by not leaving people experiencing houselessness without support or even temporary shelter.</p>	No

61-D.		<b>Favor</b>	Kathryn S Rosenfeld	<p>I appreciate this agenda item being spoken on, as the County has not done enough to decrease the high rates of houselessness in Los Angeles, nor are there enough services that support people experiencing houselessness without conditions or terms. These services are important, because there are many reasons why people are experiencing houselessness and there are many dangers that come with going to a privately runs shelter. The government needs to establish triage centers to give the much needed support to people who are often ignored by the public.</p> <p>Long-term solutions that establish more affordable and permanent housing, while extremely important, do not help individuals in the present moment. Triage centers are an opportunity to provide short-term services and support to individuals who need it.</p> <p>Triage centers are an effective way to provide people experiencing houselessness with temporary shelter and services. 61-D.		Favor	Katie Aymar	<p>I appreciate this agenda item being spoken on, as the County has not done enough to decrease the high rates of houselessness in Los Angeles, nor are there enough services that support people experiencing houselessness without conditions or terms. These services are important because people have immediate needs! If the city alleviates their situation, they can aim to stabilize this crisis by keeping people from sliding into more dire poverty and experiencing declines in health from living on the street without resources. We need to see the county affirming that homeless and poor Angelenos are not disposable and deserve care.</p> <p>Long-term solutions that establish more affordable and permanent housing, while extremely important, do not help individuals in the present moment. Triage centers are an opportunity to provide short-term services and support to individuals who need it. Triage centers are an effective way to provide people experiencing houselessness with temporary shelter and services. Other areas that have established triage centers have seen impressive results, with some individuals engaging with service providers at the triage centers to the point that they could find stable shelter and employment. 61-D.		<b>Favor</b>	Regina W Speights	<p>I appreciate this agenda item being spoken on, as the County has not done enough to decrease the high rates of houselessness in Los Angeles, nor are there enough services that support people experiencing houselessness without conditions or terms. These services are important, because the county continues to politicize contracts and grant monies. Stop giving to the large organizations....it is obvious they cannot alleviate houselessness. Give to the grassroots organizations who are mobile - like the Sidewalk Project. The people respect them and they have established rapport via lived experiences!</p> <p>Long-term solutions that establish more affordable and permanent housing, while extremely important, do not help individuals in the present moment. Triage centers are an opportunity to provide short-term services and support to individuals who need it.</p> <p>Triage centers are an effective way to provide people experiencing houselessness with temporary shelter and services. 61-D.		<b>Favor</b>	Trevor Byrne	<p>I appreciate this agenda item being spoken on, as the County has not done enough to decrease the high rates of houselessness in Los Angeles, nor are there enough services that support people experiencing houselessness without conditions or terms.</p> <p>Long-term solutions that establish more affordable and permanent housing, while extremely important, do not help individuals in the present moment. Triage centers are an opportunity to provide short-term services and support to individuals who need it.</p> <p>Triage centers are an effective way to provide people experiencing houselessness with temporary shelter and services. Other areas that have established triage centers have seen impressive results, with some individuals engaging with service providers at the triage centers to the point that they could find stable shelter and employment.</p> <p>Triage centers are a simpler, stop-gap solution compared to long-term, stable housing. Triage centers can serve as temporary shelter from summer heat waves, a place to store belongings, somewhere to connect with service providers for more long-term support. This model can save lives by not leaving people experiencing houselessness without support or even temporary shelter.</p>	No
